SOFTWARE / PRODUCT ENGINEER

Software / product engineer in transition with a background in education, systems design, and user-centered problem solving. Builds full-stack tools that turn messy real-world data and workflows into clear, usable products.

TECHNICAL SKILLS

- Languages:** JavaScript, Python, SQL, HTML, CSS
- Frontend:** React, Vite, responsive UI, component-based design
- Backend:** FastAPI, REST APIs, SQLite, data modeling
- Tools:** Git, GitHub, Cloudflare Tunnel, PM2, command line, API testing with curl
- Product:** user workflows, product framing, documentation, debugging, portfolio case studies

PROJECTS

Deal Meal Planner

Full-stack grocery deal intelligence platform | [Case Study](#)

- Built Deal Meal Planner, a full-stack grocery deal intelligence platform using FastAPI, SQLite, and React.
- Designed API-driven workflows for ingesting, normalizing, searching, and ranking weekly grocery flyer deals.
- Modeled messy retail flyer data with SQLite views to separate price-comparable deals from BOGO and promotional rows.
- Implemented product features including smart deal ranking, item search, meal-planning support, and shopping-list workflows.

EXPERIENCE

Media / Language Arts Teacher

Barberton City Schools | Barberton, OH | August 2007 - Present

- Designed classroom systems that translated complex learning goals into structured workflows, routines, and feedback loops.
- Communicated technical and procedural information clearly to diverse learners, families, and colleagues.
- Used iteration, observation, and user feedback to improve systems under real-world constraints.
- Managed competing priorities, deadlines, and stakeholder needs in a high-communication environment.
- Explored practical uses of AI and software tools to support learning, planning, and classroom workflows.

EDUCATION

Master's in Principalship University of Akron	2012
Master's in Language Arts with Licensure University of Akron	2006
Bachelor's Degree in Marketing Kent State University	2000

CERTIFICATIONS / CONTINUING LEARNING

- Teaching License
- Independent study in full-stack development, AI-assisted engineering workflows, API design, and product-oriented software systems
